

Neuro-Linguistic Programming (NLP) moves into Manufacturing.

NEWS:

- Ian Rowledge registered as a Master Practitioner of NLP - January 2007
- Adrian Pask registered as a Practitioner of NLP - February 2007

What is NLP?

Neuro-Linguistic programming is a set of techniques, insights, and skills which can enable you to improve how you think, help you identify what you want to achieve, and how you want to do this, and then assist others to do the same.

Why use NLP in OptimumFX?

At OptimumFX we are always looking for ways in which we can help our customers get to grips with implementing change more effectively.

Having members of the team as certified NLP practitioners provides us with unique training and coaching skills to really help you implement change in your site.

We can incorporate our knowledge of NLP into your training sessions, one-to-one and team coaching, and project management programmes to help you plan, communicate, and implement change even more effectively.

When you contact us to find out more, you will realise that NLP will help you to communicate change in a way that helps people to accept it and make it happen.

Feel free to contact us and find out more:

How can NLP help me?

If you have thought any of the following...

We spend a fortune on training, what is the best way to ensure it gets used?

How can I communicate more effectively with my shop floor and management teams?

When we run projects they start really well, how can I keep momentum going?

...we can help!

What other people have said about NLP:

Science Digest said that NLP 'could be the most important synthesis of knowledge about human communications to emerge since the sixties.'

Time Magazine announced that 'NLP has untapped potentials for treating individual problems.'

Training & Development Journal reported that NLP 'offers the potential for making changes without the usual agony that accompanies these phenomena' and that it 'allows for increasing options, flexibility, creativity and therefore greater freedom of action than most of us know.'

Best-selling author and motivational speaker *Anthony Robbins* said that NLP is 'an incredibly effective and enjoyable way to access more of the true potential of your brain.'
