

Control Engineer – PLC/SCADA programmer.

About you:

Do you want to work for a consultancy that works with big blue chip FMCGs such as Coca Cola and Diageo? Are you a self motivating individual who enjoys working as part of a team? Would you like to get involved in bringing complex projects from design to customer sign off? Do you thoroughly enjoy being responsible for coordinating system hardware and software installations? Do you exhibit excellent attention to detail skills? Would you like to travel to the various customer sites located in the UK and mainland Europe?

Ideally you will have an industrial background as an electrical engineer within a production or continuous improvement environment. You may have had experience working with SCADA systems in your past roles and be looking for further experience in this sector.

As well as being part of a team that delivers system installation projects you will enjoy being rewarded for implementing your own improvement ideas to reduce implementation costs. Although you will work extremely effectively under your own initiative you will also be stimulated by working within a business with a strong team ethic in which collaboration and communication are core values.

About the job:

- SCADA software programming (Wonderware Intouch, National Instruments Lookout) for existing systems and development of new control / monitoring systems
- System installation from initial design to customer sign off
- PLC Programming
- Completion of customer functional design specification documentation
- Project time and cost control
- PC and PLC Networking
- PLC fault finding and code improvement
- The office is in the Birmingham area (J2 M42) with partial home working. European travel flexibility is required.

Essential

- Project Management – including cost control, managing contractors and time
- **Experience of at least three of the following:** Wonderware Intouch, INSQL, PLC5, Siemens S5 / S7, Microsoft visual basic, National Instruments Lookout, Allen Bradley PLCs Control Logix/SLC, Industrial PLC programming.
- Excellent attention to detail
- Electrically trained/apprenticeship
- Tenacious and thorough
- A natural problem solver who enjoys creating and optimising solutions
